### Greetings to all OVH'ers,

It is my sincere wish that each one of you had a wonderful holiday season with both friends and family. The **OVH Christmas Party** proved to be a big success, as everyone in attendance appeared to have a great time. The event was attended by club members, their families and guests. I'd like to thank both **Dwight/N4GSD** and **Theresa/KG4TVM** for spearheading that wonderfully festive gathering. With the New Year upon us, planning of the **June Hamfest** has already begun. A hamfest planning meeting will be held at the **Blasdell's** home this month. If you have any suggestions, or otherwise would like to help make this year's hamfest a success please, please feel free to either attend one of our future planning meetings or simply drop me an email. Any suggestions that are received by me will readily be passed on to the hamfest committee.

OVH's next meeting will be held on Monday, January 19<sup>th</sup> at 8 PM at the **NOVEC Technical Center** located in **Gainesville, VA**. It is once again **time** for each of us to **renew our membership** with OVH. Thus, those attending the meeting should be sure to bring along both their renewal applications (which can be downloaded from the OVH website at: [www.w4ovh.net](http://www.w4ovh.net)) (and it's the last page of the newsletter – editor) and yearly membership fees. Naturally, our remaining members are invited to mail their forms and fees to the club mailing address listed on the same form. Finally, I am pleased to announce that OVH member **Wayne/AG4ZZ** has agreed to **provide a presentation** on the joys of "**QRP and building your own radio equipment**" during our **January meeting**. I look forward to seeing each of you there.

73 for now,

Ruth/KU4WH

## **ARISS School Group Contact Falls Victim to Space Station Air Leak**

(Jan 12, 2004) -- NASA has postponed an Amateur Radio on the International Space Station (ARISS) school group contact as the space agency and station crew continued efforts to pin down the source of an apparent air leak on board the ISS. Students at Armstrong Middle School in Flint, Michigan, were scheduled to speak with Expedition 8 commander Mike Foale, KB5UAC, at NA1SS early today. News reports early today indicated that officials are fairly certain that Foale was able to locate the leak in the US Destiny Lab module. NASA has not yet confirmed this, but the space agency says the crew is in no danger from the pressure drop.

## **Austrian Authorities Pull Plug on BPL Pilot Project**

(Jan 8, 2004) -- The Austrian Amateur Transmitter Federation (Österreichischer Versuchssenderverband--ÖVSV) reports that a Broadband over Power Line (BPL) field test in the city of Linz has been cut short as a result of excessive radio interference. ÖVSV, Austria's International Amateur Radio Union (IARU) member-society, said in December that the Government Ministry for Commerce, Innovation and Technology closed down Linz Power Company's BPL pilot project because it was generating interference on the HF bands. Shortwave broadcaster Radio Austria's *futureZone* service says the case that brought the issue to a head was a Red Cross report that emergency services radio traffic during a disaster response drill last May was the victim of massive

BPL interference.
