The next meeting will be on Monday,

CLUB OFFICERS:

President Al Picard K4IQH Secretary Jim Fry WA4ZWN  
Vice President Sam Lebowich WB4HAV Treasurer Ed Fleming WD4AVU

MEMBER

Amateur Radio News Service

### The President Says:

BY AL PICARD K4IQH

By the time this newsletter is dispatched we will have begun a new year. As far as the club is concerned, I look back to 1978 as a year in which much was accomplished. To mention a few; our auto patch is nearing completion and will be installed soon; we enjoyed another most successful hamfest; we participated effectively in field day; emergency communications tests were conducted and; many accolades were received concerning the high degree of professionalism participating club members displayed while providing communications for the Christmas parade. The above are but a few of the accomplishments we can be proud to have been a part of during the past year.

Granted, there are some of us that feel our achievements fell behind our goals. I include myself within this group. However, there is one point I believe significant which may put goals vs achievements into proper perspective.

The operation of our club, its goals and achievements are based upon an activity we all call a hobby. A hobby equates to fun, an enjoyable experience and/or a diversion from one's everyday work. For this reason it is unrealistic to assume that accomplishments will be made at the same pace as one would achieve at work. To make a long story short, when our hobby begins to take the flavor of work, we, the club, will suffer. Remember, club members donate their time, and we should be more thankful

(cont page 3)

The "Ole Virginia Hams" provided communications for the Greater Manassas Chamber of Commerce Christmas Parade held on December 2, 1978 in Manassas, Va. About 24 members handled communications concerning parade order, spacing along the parade route, addition parade details for the parade judges, local radio and educational TV. The communications net covered twelve organized posts along the mile long parade route. NCS was handled by Russ Stevens who reported that the net operated very smoothly. The two hour long parade was a huge success with the crowd of approx. 65,000. The Chamber of Commerce has requested the services of the "Ole Virginia Hams" for the parade next year. Thanks to Henry Ahalt for the article and an efficient job of chairing this event.

A new repeater is on the air at Sterling Park, Va. The frequency is 146.115/.715. The frequency is very close to the Frederick, Md. repeater. Has anyone worked this new machine yet?

Listened to Harry, W4PVA on the Net tonite from the office while typing this newsletter. It appears that all club members better read the Editorial Page and the article starting on page 62 re: Quiet Zones near FCC Monitoring Stations and also near some Observatories. Read the article for all of the details and be prepared to take a stand on this item as comments have to be in by January 20.

Here are some items from my fine field reporter Herb Plummer, W4PJP, ("POPE JOHN PAUL"). Thanks for your interest in the Newsletter Herb and keep the articles coming. The Ole Virginia Hams Novice Course ran from Sept. 26 to Dec. 5, 1978. We began with 12 students and ended up with 7 students. Most of the incompletes were due to pressure from work and the holidays. Of the 7 consistent students, 5 passed their 5 WPM code test-filled out the Form 610 application for Novice License-and are awaiting their theory test. The two remaining students need a bit more code speed to get their 5 WPM. We hope they keep up their practice and will be ready for the code test soon.

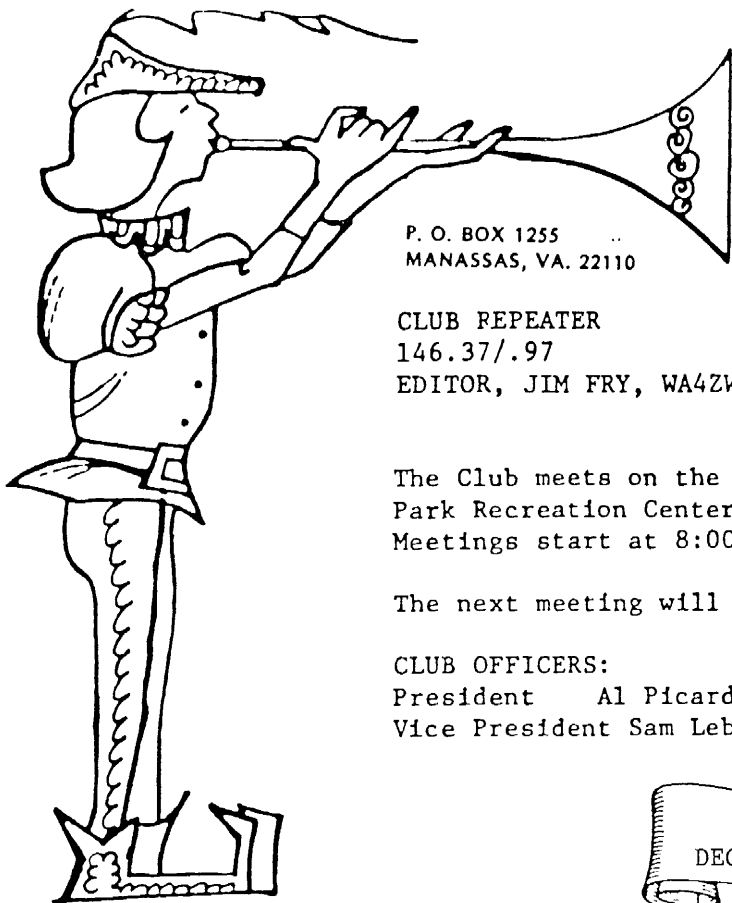

We wish to thank the following instructors for their wonderful help in teaching the code and theory: Phil Zettle AC4O, Tony Martin W4FOA, Henry Ahalt N4AZC, Milt Warnock N4SN, Jay Watkins AC4N, Jim McKinley WA4OJY, Bill Springfield AE4A, and Harold Robinson N4QX.

We especially wish to thank Henry Ahalt, N4AZC for making possible the use of the facility at Stonewall Jackson Senior High School.

If there are sufficient requests we will be glad to commence courses on Technician and General classes and rerun the Novice Course. All we need is a few applicants. Just pick up the telephone and call 754-7480 or drop a letter/post card to my address in the club roster or P.O. Box. 1255, Manassas, Va., the club mailing address.

A form 610 for a Novice exam was mailed to the FCC on 2 December, Sat. The written exam was received the following Saturday, the 9th. If any of our members could act as an Elmer for a perspective ham in your area, please call Herb and get on his list for these worthwhile assignments.

Lynn, WA4YHZ, is on the HF bands. He reports that the Cumberland, Md. Club met him at his home and are "A Swell Bunch Of Guys". They did get his HF Antenna up last Saturday. Not sure what type.

Joe Schlatter, K4FPT, has a catalog and price list from Hobby Industries, Council Bluffs, IOWA. They have a fairly complete inventory of Manuals for Ham Gear, including the older 1950's vintage equipment. If you are looking for a manual, call Joe at 369-7267; he will check the catalog and give you price and ordering information.

It was good to see Harry Glessner at our last meeting for a visit. Harry, you're welcome at all times so come up more often.

Harry, W4PVA, has a copy of ARRL Bulletin #737 to All radio Amateurs dated December 21, 1978. It concerns anyone who has tapes or transcripts from QSO's with certain stations at Jonestown and Georgetown, Guyana. If you have any of these please contact Harry for further details.

I have accepted chairmanship of "Field Day 79" and expect to have some meetings before much longer. Must get the holidays over with. I hope we can have a very successful Field Day but the help of all of our members will be needed. I would like to get a very good score this year so all of our good testers, CW operators, etc. make plans to be with THE OVH FOR FIELD DAY. I will be contacting YOU for a commitment.....

(cont. from Page 1, The Pres Says:) for the accomplishments and less critical when we come up short.

With completion of the above "Swan Song" I would like to take this opportunity to wish all a most healthy and prosperous New Year.
