THE PREZ SAYS

Jim, WD4OJY

Hi All:

This will be a small one this month. The lack of an upcoming club activity, international operating events and a very early deadline have made it difficult for me to put a lot on paper.

There was only a small turnout at the last meeting. I don't think we had enough folks to take a vote. It's hard to remember the meetings with all the summer activities going on.

Will there be an OVH picnic again this year? I heard yes, but don't know where or when. Last year, it was at Long Park on a cool windy day. The food was good and those that came had a good time. I hope we can do it again this year.

Let's see now, operating events....How about local operating events? As most of you know, there is a net each Thursday evening at 8 pm on the OVH repeater. Harry, W4PVA, has been doing the net for many years and each week he shares a great deal of information to those that listen in. Upcoming local activities such as hamfests and VEC sessions, ARRL bulletins, and even NEWSLINE, that adds some national news, are only a few of the things shared each Thursday evening. For those of you that just want to get together and ragchew, a small group of local hams get together each Sunday about 1 pm on 28.340 MHz. Although they use a net format, it's really just an informal get together to see who might be around. As you know, 10 meters is changeable, so you never know who you might hear from week to week.

That's all from me. See you at the August meeting and.....73 for now

Cushcraft AOP (AmSat Oscar Package \$125.00
 16 element 144 MHz, and 20 element 430 MHz, circular polarized beams, 5 foot cross boom to mount both antennas.

Heathkit SWR/Power meter, 2Kw/200w with remotable sensor. \$65.00

Contact: J. Edgar (NS5N)@ (703)330-7333

FOR THE TAKING:

110 Foot commercial tower. Tower is down at this time and available for pick-up. It is approximately 30 years old but in very good conditon. It is steel and comes equipped with a ladder built on the side. It is free standing and will sustain winds to 85 mph and gusts to 120mph. Leg spacing is approximately 15-18 feet and would require about 9-15 cubic yards of concrete per leg. All that is required to complete the tower is some additional assembly bolts. If you are interested, you could also come away with the 5 element 20meter beam. This beam has a 90 foot boom for the serious Dxr.

Ole Virginia Hams A.R.C., Inc.
Post Office Box 1255
Manassas, VA 22110

Well friends, it has come down to the end of the trail here in Manassas. My new home for the next year, at least, will be beautiful downtown Caracas Venezuela. I plan on operating HF as well as getting active again on 6 meter SSB & CW, so if anyone needs YV on the bands, be sure and listen for me. Editing the OVH Times has been a wonderful experience and I will always remember the goodtime that were had meeting those deadlines and the great support from the club members. 73 all..
